Capability Information

What we do

HTD Australia Pty Ltd service sole traders, local and interstate Councils, major service and network providers and small to large construction companies. We have the knowledge, experience and resources to ensure all projects run smoothly, on budget and to plan.

About us

HTD Australia Pty Ltd has been operating for nearly three decades, collectively our team has over 50 years experience in horizontal directional drilling.

We offer various trenchless techniques for installing conduits under residential gardens, paths and driveways to main roads, highways, rivers and rail. We also have the capability to drill through the toughest of rock conditions.

We pride our business on consistent high quality service, maintaining our plant and machinery and co-ordinating projects safely and efficiently.

At HTD Australia we continually review and improve our quality, safety and environment management systems. In April 2015 we gained certification for our systems against ISO9001 Quality Management and AS/NZS 4801 Safety Management and more recently in April 2016 achieved certification for ISO 14001 Environment..

Our plant and equipment includes:
